

Taking a screenshot

Full Screen

```
import pyautogui

pyautogui.screenshot("C:\\Users\\Nicholas Goh\\Desktop\\test.png")
```

Specific areas to screenshot can be specified by using the Region argument

```
import pyautogui

pyautogui.screenshot("C:\\Users\\Nicholas Goh\\Desktop\\test.png", region=(0, 0, 100, 200))
```

Replace `C:\\Users\\Nicholas Goh\\Desktop\\test.png` with your own file path and file name. Double backslash in the file path `\\` is required as `\` is an escape character

`Region` requires an integer value and signifies in order: Left, Top, Width from Left, Height from Top
